

# MINIMALISMUS

Modern minimalism – if you have chosen this interior design style, you love clean shapes and focusing only on what's important.

In this case, plants are an essential design element to give the reduced interior design that touch of vitality. Put the focus on truly exceptional plants. A solitary object appears almost like a sculpture while a group of several plants will wow onlookers. The trick is to go light on the greenery to emphasise the full effect of the style's clean lines.
