Something's cooking

PREFACE –

We all know that moment in a sales talk when planning turns sour. The customer is basically sold, but there's just one small detail that isn't right – an appliance doesn't match, there's a gap under the ceiling, the customer's dream style isn't feasible at the requested price level. And that is where our 2027 collection comes in.

The new fronts give you additional selling points. Oak cognac adds a warm wood look to the entry-level segment – a style that was previously hard to get at this price level. PRIMO oak crema and oak chocolate go for the other end of the price range, with genuine wood veneer. And pistachio opens up three product ranges with just a single colour, from smooth fronts to a classic framed look.

We have also added new features that do away with the need for custom solutions. Front extensions and ceiling panels for a practically floor-depth effect. Recess panellings up to 5,100 mm without divisions. And twelve quartz stone worktops with a polished or satin-finish decor. All new features have the same approach: fewer transitions, fewer compromises, more connection. This makes choices during sales talks significantly easier – and leads to kitchens that your customer will love, even years down the line.

One of the major new features of 2027 goes far beyond the kitchen itself. In line with the motto "made to match", nolte now offers sinks, taps, large and small appliances fully adapted to the design language of our kitchens. These create a coordinated style, in which the kitchen and its equipment look truly made for each other. For your sales talks, this means: coordination is a lot less work and you can offer a solution that is sure to convince your customers at first glance, as everything matches.

Heiko Maibach

MANHATTAN OAK

Cognac

A WARM HUE WITH A UNIQUE DEPTH.

A vivid grain pattern and golden-brown shades give oak cognac the kind of depth that you can see even from two metres' distance. This hue is right at the centre of the colour palette – bright enough to avoid constricting a room, dark enough to carry it. This wood does not push to the front, but still tips the scales.

AI MODIFIED

Quality need not be costly.

Manhattan Oak cognac Velluto Pistachio mat

TIMELESS WOOD LOOK WITH A FRESH ACCENT.

Oak cognac adds a warm, golden brown wood hue to the MANHATTAN range: Its natural, delicate grain pattern creates a timeless wood look that is perfect for modern and classically cosy kitchens. As a new decor in the entry-level segment, MANHATTAN oak cognac offers a high-quality wood look at an appealing price. Combining it with VELLUTO in the new pistachio mat colour creates a fresh contrast that looks both contemporary and inviting – particularly in open-plan combined kitchen and living rooms.

WORKTOP E48 Oak cognac

No gaps in the plan.

For ceiling-height tall and wall units, the new ceiling filler panel in a front finish closes any gaps between the units and the ceiling. The structure matches the flush-with-front SP filler pieces for tall units, meaning the material, lines and gap pattern harmonise perfectly. The filler pieces are available in multiple widths up to 2,000 mm and help integrate units in the space to create a calm, high-quality look.

The worktop, panel and recess panelling feature the same decor as the front for a consistent wood look. The surrounding elements look like they were carved from a single piece, thereby creating a calm, balanced full picture.

MotionLINE Slim adds a particularly slim, elegant solution for apertures to the existing wall rail system. The reduced profile fits seamlessly into modern kitchen designs, with flexible accessory modules creating storage space, ready at hand, to keep work areas tidy. The profile is available either without lighting or with dual LED lighting. The version with lighting combines beautiful mood lighting with functional workplace lighting, creating the ideal light situation for any occasion.

The inductive charging station with MagSafe function fits subtly into the recess panelling and can be used horizontally or vertically for wireless charging.

PRIMO OAK

Crema

A CREAMY HUE WITH A STRONG PERSONALITY.

Gentle creamy colours and a naturally grown grain give PRIMO oak crema its bright, calm appeal. This genuine wood veneer opens up a space without making it look empty – its grain pattern remains visible even across large surfaces. This is the perfect hue for those calm moments of joy, for sipping a quiet cup of coffee and for relaxed cooking, every day.

Cream of the crop.

Primo Oak crema Stone Sand lime cream

TWO TEXTURES. ONE LANGUAGE.

PRIMO oak crema and STONE sand lime cream unite a natural feel with material authenticity. The warm wood grain of the genuine wood veneer meets the delicate stone look; soft creamy hues unite the two surfaces to create a balanced whole. This plan makes deliberate use of generous front surfaces to allow the wooden texture and stone look to reach their full potential and create a calm and cosy kitchen ambience.

HANDLE COMBINATION 628

PRIMO 690 Oak crema

STONE 26S Sand lime cream

WORKTOP S01 Sand lime cream

The access doors are now also available with a vertical MatrixArt handle profile. The single-leaf door with the slide-in plinth creates a transition to the adjacent rooms.

No half measures.

The recess panelling is now available in a length up to 5,100 mm without divisions. This creates a solid, calm surface along the entire kitchen run, presenting the perfect stage for the authentic look of wood, stone or marble decors. Fewer gaps, simplified assembly and a great design effect make this solution one of the technical highlights of our new range.

STONE sand lime cream features an authentic stone look and a texture with delicate nuance. This bright decor makes any design look first-class and can be used anywhere – as a front, worktop, recess panelling, panel or plinth.

PRIMO OAK

Chocolate

LUSCIOUS DEPTH. CALM EFFECT.

Dark brown colours and a soft chocolate hue are what give oak chocolate its depth. As with a piece of quality chocolate, the depth is not in the sweetness, but in what remains after: a fine grain that adds a touch of motion to the entire veneer. These genuine wood surfaces don't fill up the room, they carry it.

AI MODIFIED

Oak from its sweetest side.

Primo Oak chocolate Soft Lack Greige soft mat

THREE MATERIALS. ONE PRESENTATION.

PRIMO oak chocolate adds a second genuine wood veneer in a darker colour with delicate nuances to the range. A calm grain and deep brown hues give the design depth. Marble palazzo is a true eye-catcher for the recess panelling and worktop: Its bright, greige hues are also found in SOFT LACK greige soft mat, connecting the two materials. Mat lacquer handles in sepia brown pick up on the darker colour of oak chocolate for a fully coordinated design.

WORKTOP M53 Marble palazzo

Down to earth.

The new front extension shows its full effect at the island. Hinged doors protruding downward extend the front to a point just above the floor, leaving only 15 mm of the plinth visible. This creates a solid, monolithic appearance with clean lines.

The new design shelves made of black aluminium add a high-quality interior option to the range of designs for glass cabinets and other units. Depending on the version, they offer space for bottles and glasses and unite tidy storage with elegant presentation. Available for 600 mm wide units with adjustable shelves or glass shelves.

The new board set creates additional storage space for small utensils, keeping them easy to see and ready at hand. The black board made of high-quality sheet steel is equipped with two large boxes, permitting flexible installation on walls, inside the carcass or on the inside of a door. In this plan, it complements the buffet unit by adding a second convenient organising solution.

Beauty to make your heart melt.

Primo Oak chocolate Evora Lack Cashmere soft mat

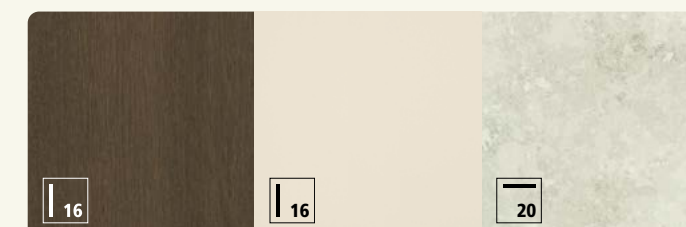

CHOCOLATE AS A HIGHLIGHT.

This plan uses PRIMO oak chocolate as a deliberate highlight. The dark genuine wood veneer complements the bright, calm effect of EVORA LACK cashmere soft mat, giving this kitchen added depth and expressiveness. The union of genuine wood and genuine lacquer highlights the high-quality design of this plan. The new bronze mat knob adds a subtle eye-catcher and replicates the hue of oak chocolate.

KNOB 183
Bronze mat

PRIMO 691 Oak chocolate
EVORA LACK J42 Cashmere soft mat
WORKTOP Q21 Milano royal grey satin-finish

For the first time ever, the full-length doors for tall units are also available for EVORA LACK. This makes it possible to use the characteristic framed look for a variety of different unit formats – for a solid, calm design. The fronts are available up to a width of 600 mm and up to a height of 2,250 mm.

Sturdy. Yet shapeable.

Milano royal grey satin-finish adds a delicately coordinated mineral surface to the bright cashmere front and highlights the clean design of the island. The new quartz stone worktops are available in twelve decors, permitting systematic coordination with different colour and material concepts. In addition to their high-quality look they offer flexible adaptation options – from cut-outs for hobs and sinks to built-under sinks, flush-fitted solutions and recess panellings.

Oak chocolate continues from the open shelf units through the plinth to the versatile panels. The genuine wood veneer creates depth and structure, while a panel rounded on both sides, used as a bar top panel in this plan, adds a soft, flowing touch.

FOCUS

Pistachio

NATURAL. LIGHT. BALANCED.

Soft green hue and a mat surface define the balanced effect of pistachio. This soft colour adds a touch of freshness and lightness to a room and combines a natural look with relaxed elegance.

Not mint.
Not sage.
Pistachio.

Focus Pistachio soft mat

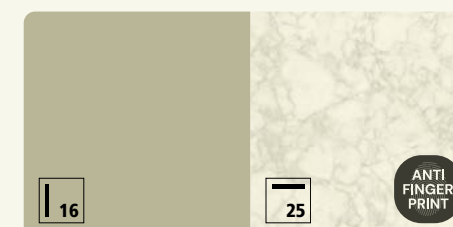

SOFT COLOUR. CLEAN CONTOURS.

The soft colour pistachio gives classic and modern fronts a fresh look. It is available in three product ranges: as a smooth front with anti-fingerprint properties in VELLUTO and as a classic framed front in FOCUS and PORTO. In the plan shown here, FOCUS with its clean framed look underlines the contemporary country-style character. The new knob in manganese bronze replicates the hues of its surroundings and elegantly draws the eye to the classic front.

KNOB 187
Manganese bronze

FOCUS 833 Pistachio soft mat
WORKTOP A60 Catania marble

Small appliances no longer need to move from place to place. The new base unit gives them a home and makes them easy to raise on the swivel table – which carries loads of up to 16 kg – whenever they are needed. Accessories are stored in the interior pull-out directly underneath. And the work surface stays clutter-free.

X marks the spot.

These cross inserts made of genuine oak wood divide the shelf unit into four compartments and hold bottles securely. They are available for base and wall units, with one or two divisions. This is an organising system you don't need to hide behind a door, because it opens up the plan.

The design shelves can now also be inserted in 350 mm deep glass cabinets and wall units. Wine glass holders and the black glass tray give glasses and bottles a home – and show them off rather than hide them away.

Now available from nolte.

The subtle frameless hob simply melds into the design of the island. This is all thanks to the most important new feature of this year's collection: In line with the motto "made to match" nolte presents a new range of appliances and accessories, featuring designs, functions and colours that are fully coordinated with our kitchens.

made to match

NOLTE APPLIANCES & ACCESSORIES

made to match

“made to match” is a product range adapted to nolte kitchens. Fitted appliances, sinks, taps and small appliances replicate the shapes, colours and details of the design – all the way down to the joint pattern and lines. All the details are planned together and look like an unbroken design in the end.

Fits down to the last detail.

The layout of nolte's appliances is adapted perfectly to nolte kitchens, so the resulting gap pattern is particularly even. Reduced gap dimensions and matching proportions permit precise integration in the kitchen plan. Production “made in EU” combines high-quality materials, reliable technology and precise workmanship, for products designed to easily withstand the strains of everyday use.

DESIGN & ACCURATE FIT

Added value with less effort.

One contact point for the entire order: Kitchens, appliances, sinks and taps are all planned, ordered and delivered via nolte – meaning fewer interfaces and greater process reliability. You will benefit from attractive value for money in the mid-level segment with appliances that unite design and function. nolte offers state-of-the-art technology in two design lines: mat black and gloss black, to match different kitchen designs and customer requests.

EFFICIENT ON EVERY LEVEL

Two looks. One brand.

Greater selection. Greater plans.

Our range offers the right solution for practically any kitchen situation – from induction hobs in a width of 30, 60 or 80 cm to hob extractors that allow a width of 80 cm in a 60 cm base unit. A choice of installation variants – top-mounted or flush-fitted – creates additional planning options.

DESIGN & PLANNING FREEDOM

A perfect match.

Sinks in sahara, lava or black combine perfectly with taps made of solid stainless steel in black or stainless steel – for a tone-in-tone design or as a deliberate contrast. Models with or without a draining board and – depending on the sink in question – available as a built-under variant offer extra flexibility in planning.

MATERIALS & COORDINATION

Product range at a glance.

NOLTE OVENS /
COMPACT APPLIANCES / MICROWAVE

made to heat

Ovens, compact appliances and microwaves combine a generous range of equipment with a design adapted to nolte kitchens. A 72 litre interior, an up to 20 % larger baking tray, functions for extra convenience such as SoftOpening/SoftClosing and telescopic pull-outs as a standard feature offer convincing arguments in the mid-level price segment.

NOLTE FRIDGES AND FREEZERS

made to cool

From compact built-under appliances to side-by-side combinations, the nolte range covers a variety of installation situations. 75 cm wide appliances create additional storage space, electronic temperature control and LowFrost/NoFrost systems complement the products. Select models also offer AutoMode and an interior made of a high percentage of recycled material.

NOLTE HOBS/
HOB EXTRACTORS / EXTRACTOR HOODS

made to cook

From conventional hobs to hob extractors, the nolte product range offers flexible solutions for a variety of plans. Mat or gloss, top-mounted or flush-fitted options and bridge function expand the selection. Select hob extractors permit an 80 cm cooking width even in 60 cm base units. Moreover, extractor hoods with surfaces designed to match are available for circulating air mode or extraction mode – with extraction capacities of up to 710 m³/h and energy efficiency rating A.

NOLTE DISHWASHERS

made to clean

Fully-integrated dishwashers with door-on-door installation fit seamlessly into the kitchen plan. XL interiors offer space for up to 14 standard place settings, depending on the model, while flexible baskets simplify loading. Select appliances only require 8.4 litres of water in the Eco program.

NOLTE SINKS / TAPS

made to flow

Sinks made of quartz composite with a natural quartz content of 75–80% and taps made of solid stainless steel are adapted to each other in material, feel and details. The sinks are made in Germany and are as durable as they are easy to clean. A diamond texture and Total Black details on black sinks bring the matching design all the way to the level of the accessories.

NOLTE KETTLES / TOASTERS

made to complete

Kettles and toasters bring the nolte colour palette to the small appliances segment. In sahara, lava and graphite, they complement the plan with functional products at attractive value for money. Temperature selection from 40–100 °C for the kettle and six toasting levels for the toaster add even greater utility.

5 good reasons to choose the nolte own brand.

01 Very good value for money

- Attractive conditions
- Technically and visually on a high level, positioned in the medium price segment
- A noticeable upgrade to your overall offer at a manageable extra price

YOUR BENEFIT: You can offer kitchens with visibly high-quality equipment, set yourself apart from competitors and remain flexible in your pricing calculations.

02 Exclusive brand – an end to direct comparability

- Available exclusively via nolte and nolte partners
- Controlled price positioning – your calculations and margins remain protected
- Not available on large online platforms or in electronics markets
- No direct comparability in price portals
- All technical data, images and other information are available 24/7 in our shop, which is always kept up to date.

YOUR BENEFIT: There is less discussion about prices and discounts, you can safeguard your pricing sovereignty and strengthen sales in your own sales channel.

03 Complete solution from a single source – including logistics and simplified selection

- Taps, sinks, small and built-in appliances – visually and functionally perfectly adapted to nolte kitchens for a consistent overall look
- Clearly structured product range with sensible appliance combinations
- One product range, one contact point, one delivery – for the kitchen, sink, tap and appliances

YOUR BENEFIT: Fewer interfaces, simpler ordering, one delivery and fewer discussions about comparisons – the sales talk reaches a conclusion more quickly.

04 Reliability and plannability in service cases

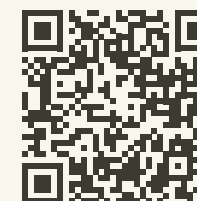

- Managed directly by Nolte as the kitchen manufacturer
- One clearly defined contact point for complaints and service cases
- Uniform warranty and service conditions across all product groups, with additional extended warranty periods for selected products
- Long-term availability of spare parts through a centrally managed product range

YOUR BENEFIT: One contact point, quick solutions in service cases – and planning reliability for you and your customers.

05 Consistent design concept – visible upgrade to your kitchen planning

- Colours, surface finishes and lines adapted to the Nolte kitchen range
- Sinks, taps, small and large appliances fit seamlessly into the overall design
- Exclusive designs only available through nolte appliances and accessories

YOUR BENEFIT: A visibly high-quality overall effect for the kitchen and a clear differentiation from competitors.

Units 2027

Full-length fronts and sophisticated unit solutions define the new features for 2027. A key focus is the introduction of front extensions – to end cleanly at the ceiling at the top and look practically floor-length at the bottom. New unit types and multi-plan solutions complement our product range with convenient functions for everyday kitchen use.

“ At nolte Küchen we combine our passion for high-quality kitchens with a profound sense of responsibility for our environment and future generations. ”

Sustainability at nolte.

At nolte Küchen, sustainability is firmly embedded in our company strategy. As a family-owned company with production facilities in the towns of Löhne and Melle, we unite quality, timeless design and reliable kitchen solutions while demonstrating responsibility for resources, people and our home region.

OUR COMMITMENT TO ...

THE COMPANY

As a matter of good corporate governance and the associated values, we have established resilient structures, processes and partnerships over a period of many years. For instance, our quality management is certified according to DIN EN ISO 9001:2015. Top quality, modern aesthetics and attractive value for money are essential criteria in the development of our product range. We focus particularly on creating long-lived, repairable kitchen solutions that are reliable and stand the test of time.

THE ENVIRONMENT

Wood is our most important raw material and makes up around half of our purchase volume. Over 99 % of the wood we use is from FSC® and PEFC-certified sources. At our production sites in the towns of Melle and Löhne, 100 % of the electricity we use is from renewable sources and around 97% of our heating is covered by wood waste from our own production. Our energy management system certified according to DIN EN ISO 50001 helps us optimise our energy use, step by step.

PEOPLE

Our employees are one of our top priorities. Their commitment, knowledge, experience and curiosity are what makes nolte Küchen what it is today. That is why we support our employees in their personal development, both professionally by offering initial and continued training opportunities, and in the private sphere by respecting and promoting a healthy work-life balance.

SOCIETY

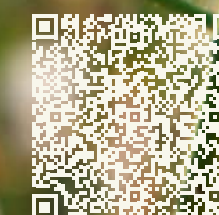

Since its early days, nolte Küchen has had a close relationship with its home region and we actively promote its health and growth. Social commitment is a tradition for us, and we have placed great emphasis on it from the very first day. We help people and regions in emergency situations, such as educational institutions, associations and foundations that are involved in child protection. Our motto: We give support where support is needed.

SOMETHING'S COOKING

Since the summer of 2023, the nolte Küchen grounds have also been a home to local bees. They not only provide delicious honey but are also indispensable pollinators, making a significant contribution to the preservation of many plant species.

On request, our products are available with FSC® or PEFC certification. Please contact us for further information.
