Living

in the kitchen.

KITCHEN JOURNAL 2020
The authentic melamine resin surface perfectly creates the illusion of real wood.

Layers of a blend of resins, lacquer and particles of metal make the fronts magnetic.

Each one of these hand-crafted fronts has a surface made of real cement and is one of a kind.

Real glass, very high-quality surface made of back-lacquered safety glass.

As an authentic and genuine natural product, real wood conveys warmth and a sense of security.

The fronts are finished in multiple coats of high gloss or soft mat lacquer for the most exacting of demands.

A surface that is both easy to keep clean and hard-wearing, high gloss or soft mat depending on finish.

Proven quality, guaranteed industry and healthy living.
The kitchen is the room of rooms. We probably live more, and more intensively, here than anywhere else in the home. It is the place where we meet, where we encounter others. As family or friends. As a couple. We cook, eat and enjoy ourselves in the kitchen. And sometimes we have all the time in the world as we do so. We argue. And make up again. We read, write, send emails, post messages. And maybe philosophise a little. And – quite secretly – the kitchen sets the rhythm of our day. Good morning. Then midday. Then evening. And sometimes night … Which is why we love the kitchen.

Living in the kitchen.
LIVING IN THE KITCHEN

"The kitchen is a room for cooking in. That was yesterday. Today it has become the communication hub of the home and haven of well-being. Cooking, eating, talking, laughing, living, relaxing, working – life takes place in the kitchen. That’s why this room is taking on more and more significance in the home.

In choosing a kitchen, you are also choosing a whole world. Living in the kitchen has many sides to it, is individual and, above all, also a matter of your personal style. And style can also be expressed in many different ways: in fashion, in the home, in the music you like, and much more besides. So why not in the kitchen?

The good part about Nolte Küchen: individual taste and personal style are not a question of budget. And if, after browsing through this journal, you decide you would like a new kitchen, then you can get right down to planning it: with the Nolte Küchen web planner at www.nolte-kuchen.de."

EVERYTHING STORED – NEXT TO THE KITCHEN

So, what sort of utility room would you like to have? This, of course, depends entirely on the space you have and your personal needs. Some prefer to use it as a storage room for household items, others turn it into a lovely dressing room with numerous drawers providing plenty of space. Just as you please.

Or create the perfect room divider: on the one hand a practical utility room with everything that goes with it, and, on the other hand, an attractive hallway area with coat rack and wall unit as a chest of drawers – where keys can be kept, for example.

THE ART OF OMISSION

“The MatrixArt 900 also makes handleless possible: the handle trims integrated in the carcase make the kitchen even more graphic and sleek. A completely new dimension in kitchen architecture.”

DESIGN MEETS STORAGE SPACE

With Matrix 900, Nolte Küchen has sent out a design message and makes the crossover between kitchen and living area even more fluid: the very shallow plinth in conjunction with the 900 mm carcase height not only provides an ideal working height with a huge amount of storage space but also creates a totally new kitchen look.
PORTLAND / NOVA LACK

FASCINATING MARBLE

Fine marbling, a subtle shade of grey – the classically elegant material marble is enjoying a veritable renaissance, and conjures up a touch of modern luxury in the kitchen. The island lends the kitchen visual weight while the omission of classic wall units gives it a light and airy feel. And thanks to laminate with an anti-fingerprint surface finish, PLUS black soft mat also always looks immaculate and is easy to keep clean.

INSPIRED BY NATURE

Surfaces and materials borrowed from nature are impressively combined in STONE concrete with surrounding elements in holm oak. The concrete look is an unconventional design statement and, as decor, carries on through from the front to the inside of the units too – consistency you only get from Nolte Küchen.

The combination of expressive decors is particularly effective in conjunction with the impressive and interesting look of the counter element.

IN THE KITCHEN, ORGANISATION IS HALF THE BATTLE

"On the subject of interior organisation, we were completely taken aback by the line-up that Nolte Küchen has to offer: starting with anti-slip mats to variable cutlery and utensil dividers in plastic or even real wood, it simply leaves you wanting for nothing. We went for the option in real oak and chose it for our kitchen – this way, everything is always in its place and the drawers and pull-outs are perfectly organised. The oak colour shade goes perfectly with the quartz grey fronts."

To ensure efficient workflows in the kitchen, we looked at the best ways of making work paths ideal while we were planning it. As a general rule here: while the refrigerating/food storage, cooking and dishwashing zones should be no more than two arm lengths apart, there should also be sufficient space for two people to cook in. This has been solved perfectly in our kitchen. Which means we don’t get in each other’s way when we’re cooking.

FOR OPTIMUM WORKFLOWS

“Our kitchen centres around cooking together! When it came to choosing the most suitable hob for us, the planner’s experience didn’t let us down either, nor did the options available to us from a Nolte kitchen: here, everything’s possible, be it induction hobs or gas, retracting extractors, downdraft extractors or also the classic extractor hood. This is precisely what we ultimately decided on, it simply goes best with our kitchen!”

COOKING: A SHARED EXPERIENCE

“...Our kitchen centres around cooking together! When it came to choosing the most suitable hob for us, the planner’s experience didn’t let us down either, nor did the options available to us from a Nolte kitchen: here, everything’s possible, be it induction hobs or gas, retracting extractors, downdraft extractors or also the classic extractor hood. This is precisely what we ultimately decided on, it simply goes best with our kitchen!”
THE MEASURE OF ALL THINGS

“Let’s be honest: if you like cooking as much and as often as we do, the kitchen should fit in with us and not us with the kitchen. Because, in the long run, this is the only way that makes a kitchen a joy and pleasure to work in. With Nolte Küchen, it was so reassuring to know we could fit the oven at eye level and even raise the dishwasher as well. Needless to say, we were also able to define the height of the work surface.”

1 Ergonomic and practical: the oven at eye level.
2 Kind on the back: the raised dishwasher.
“We both love to cook and, of course, this always leaves you with waste and dirty pots. So it was important for us to know right from the start that we can quickly get the kitchen cleaned up again once we have eaten. This is where the large sink with a good-sized draining board is a huge help because it means we can easily and quickly clean pots and pans we can’t put in the dishwasher. To sort waste, we went for the classic option under the sink - it’s organised and saves us the bother of having to take it anywhere else. And because the waste bins are suspended in a frame, we’re not constantly cleaning the pull-out either because there’s nowhere bits of waste can accidentally fall into.”
"...in our kitchen, there are so many different things we need to find a place for: from kitchen appliances, cookware, plates and cutlery to all sorts of food and provisions. In the larder unit, for instance, we keep all types of non-perishable food that needs to be in easy reach all the time. Fresh food goes in the large refrigerator. In planning our kitchen, we chose a solution without any corners because that’s best for the space we have. But with Nolte Küchen, of course, we would also have found loads of clever ideas for the corner, such as the practical LeMans corner base unit."

1 Practical and a storage space wizard: the “classic” larder unit.

2 Practical and space-saving: LeMans corner base unit solution.
A LOOK OF HARMONY THROUGHOUT

“This feature, in particular, made us realise we were making the right choice: unlike most other brands, all Nolte Küchen units are finished in the same decor both inside and out, no matter which of 14 carcase decors you choose. This initially sounds like a trivial detail, but in fact it has a huge impact on the homely feel it creates: for our wall units, this means that instead of sterile white, they are finished in the same wood decor on the inside too. It fills me with joy whenever I open the cupboard. Then there’s also the “edge seal” at the carcase front. It makes sure less dust gets inside the kitchen unit.”
QUALITY IS A MATTER OF DETAILS

We accept no compromising when it comes to quality. Stringent testing provides the basis for ensuring that your kitchen will continue to be safe and reliable even after many years of use. This is also guaranteed by the GS label for tested safety that comes with Nolte Küchen. More important for you, though, is the high level of quality you experience every day in your Nolte kitchen, quality that is noticed in all the many details and features.
